

**NEW 2016 SUMMER COURSE**

**THE PRINCIPLES + PRACTICE OF SMALL-SCALE  
ORGANIC AGRICULTURE**

11:020:321 | 3 credits  
Session I, Section C | May 31-July 22

***Are you interested in urban agriculture, organic production, food security + food justice, environmental health, or community outreach + education?***

Students enrolled in The Principles and Practice of Small-Scale Organic Farming will gain experience with all aspects of basic organic vegetable, fruit and herb production, from field preparation to harvest. Through weekly readings and responses, lectures – with guests from other operating farms, Cooperative Extension, Bloustein and Nutritional Sciences, farm visits and field work, students will examine the history and philosophy of organic agriculture, as well as build a core understanding of local food systems. Topics of nutrition and food justice will have a key role, and the course will provide students with the opportunity to engage community members through outreach and education with local non-profit partners such as Elijah's Promise.

Instructor: Arianna Lindberg  
Field Work: Tuesday + Thursday, 8-9:40 am at Rutgers Gardens  
Lecture: Tuesday + Thursday, 10-11:20 am at Blake Hall 128
